BENDING OF THE LITHOSPHERE is evident in this bathymetric chart of the region around the Hawaiian Islands. The islands are volcanic structures built of lava erupted onto the sea floor. Their weight bends the lithosphere downward by several hundred meters, forming a "moat" that is deepest around the island of Hawaii. A broad region of the sea floor around the islands is probably swelled by an upwelling of hot rock in the asthenosphere; to the north and

Where is RAM?

RAM only shows up in interaction with (an/the) entity. (the User)

Same in Homosap. — there is no "hard" storage "in" a brain — a brain is a single I.C.

"I" only shows up in a brain's interaction with other brains and an environment.

* the guy "walkmaning" thru the library
his HEADPHONES were disturbing people

An interesting question: "Where is software?"
"Where is "more"?"
"Get me "more" please?"

a pervasive yet vague uneasiness arising from a refusal to acknowledge publicly, that we live moment by moment by the grace of ___; that our "together" and "responsible" acts are shams.

Room costs 30$
Each pays $10
Later clerk decides to refund $5. ~~give~~
Clerk give Bell hop ~~$~~ five $1 bills to return
Bhop keeps $2 give $1 to each person.

Question 1. originally paid $10 each
2. each got $1 back.
3. ∴ each paid 9
4. ∴ 9 x 3 = 27
5 Bhop has 2 dollars
6. Where's the other dollar?

Confusion hinges on mixing two different frames simultaneously.
1. How much was paid by whom?
2. Where's the money now?

Similar to "I don't know how I feel!"

Writing American has little relationship with spoken English.

Written English has practically very

American

Forget about spelling and LISTEN to the sounds of American

Preface: a good American accent is an important factor in gaining acceptance/success/etc. in America.

Unfortunately Some Native Americans often act as though people who speak with a strong foreign accent are stupid./are treated as though they are stupid.

BUT/AND I have a sesspool for a body.
? How may I respond to this situation.

4906

It's not that people ARE stupid — but
that we act (talk) stupidly most of the time.

Act (talk) Stupidly = act (talk) in ways destructive to Self + Earth.

OCCCG Talk

I've come to confess how incredibly stupidly I act.

Brick technology

We/People/I need (want) passion in our lives.

most of us use sex as the means to experience passion.

Sex as a ~~the~~ hobby was ok for about 10 years. In fact it was great. Sex is the ~~time~~ era of sex has passed. Sex has consequences — ~~Everything~~ No sex has consequence. Everything has consequences.

Good writing is a form of hypnosis!

Sex is no longer an appropriate vehicle for experiencing passion on an ongoing basis.

painting can be a passion — not Art.
playing piano " " " " — " Music

"Art" and "Music" are for those who neither paint nor play.

~~Anyway~~ a worthy alternative as a vehicle for passion is being involved in the process of planetary Evolution — being about the business of creating a new Earth. It's ~~the~~ not the only challenge worthy of your time/effort/love/money/comittment/enthusiasms/etc.

Actually there no cosmic law that says you can have only one passion in life

What's the difference between passion & addiction? I have a passion (or addiction) for chocolate!

In fact, ~~you can pursue the passions you~~ if you're lucky enough to know what one of your passions is, it can be put in alignment with, ~~the service of~~ an Evolutionary Passion

↓

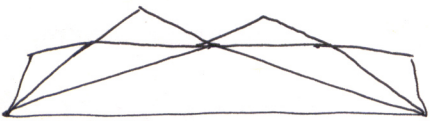
4908

throuout history sex was not a reasonable vehicle for passion for most people (only the very very rich could afford the consequences.

UNTIL 1959 — THE PILL

THE SEXUAL REVOLUTION

Passion → identification/investment



Unfortunately
I can't "teach" people to "think for themselves".

* children can grow up in an environment where people do think/act/etc. for themselves.

We live in a confusion that we can separate being objective statement of fact from value-judgement

? How do we decide which sets of "objective" data to work with? That choice is determined not by "data" but by values

It may be true (I hope it is) that people can agree on values but it is not because strictly "rational" process.

Ultimately the delemma of choosing between choosing and discovering evaporates in a puff of air. (an abstraction)

OBSERVATION

Learning a new natural (or even maybe a formal one) language is NOT something you can or can't do. You can allow it to happen. You can arrange for it to happen. etc.

It's an attitude of growth
